

10 Reasons why you should use Framo® worm gear sets:

1. Wide range of gear ratios per center distance

Framo offers the widest range of worm gear ratios per center distance on the market. This is particularly beneficial for manufacturers of worm gear motors.

2. Wide range of center distances

Framo offers 12 center distances between 0.67" and 3.15".

3. Price

Due to Framo's high-volume production we can sell our worm gear sets as much as 35% below our competitors' best price.

4. Performance

Due to advanced materials Framo's standard worm gear sets are able to handle higher torques than worm gears from the leading U.S. manufacturers.

5. High quality

Framo's ISO 9001 system, modern machinery and skilled employees ensure a consistent high quality.

6. No conflict of interest

Framo is a gear manufacturer and does not make worm gear reducers which could compete with your product line. We want to sell gears, period.

7. Experience

Framo has 40 years of worm gear experience and supplies some of the biggest names in gear motors.

8. Modifications

For large quantities Framo offers custom bores, keyways or pin holes for no extra charge.

9. Customization

Fully custom worms and worm gears in excellent quality and price are available from Framo on request.

10. Easy to select

Our catalog is arranged by center distance and ratio, not pitch, because this is the easiest way to find what you need.
